

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) Laminated or extruded flat flexible cable, ~~also called comprising~~ electrical flat conductors, characterized by the fact that the widths of ~~the~~ conductor tracks (2, 2', 2") are staggered in an arithmetic sequence and that the spacings (4) between adjacent conductor tracks are ~~preferably~~ of the same size or also staggered in an arithmetic sequence.

2. (Currently Amended) Flat flexible cable according to Claim 1, characterized by the fact that contacting of the conductor tracks (2, 2', 2") occurs independently of their width by means of connectors, ~~for example, strip terminals~~, whose contacts are provided equidistant from each other at a spacing equal to the width of ~~the~~ a narrowest conductor track multiplied by ~~the~~ a base spacing between the conductor tracks.

3. (Currently Amended) A laminated or extruded Flat flat flexible cable according to Claim 1, characterized by the fact that widths of conductor tracks are staggered in an arithmetic sequence and that the spacings (4) between adjacent conductor tracks are of the same size or also are staggered in an arithmetic sequence, and further characterized by the fact that the width of ~~the~~ each conductor ~~tracks~~ track is a whole number multiple of 2.54 mm and that the spacing between adjacent conductor tracks is 1 mm or 1 mm plus a whole number multiple of 2.54 mm.
